A Short Example

Ada Lovelace

31 October 2026

1 Introduction

This document is written in the LaTeX Emulator. The editor is on the left and the preview is on the right. Paragraphs are separated by a blank line, exactly as in LaTeX, and the first paragraph after a heading is not indented.

Later paragraphs are indented by `\parindent`. Text can be *emphasised*, **bold**, *italic*, `monospaced` or SMALL CAPS. Quotes use "double" and 'single' marks, ranges use an en-dash as in 1–10, and a pause uses an em-dash—like this.

1.1 Lists

Lists come in three kinds:

- an itemised list,
- an enumerated list, and
- a description list.

Enumerated lists are numbered:

1. First.
2. Second.

2 Conclusion

That is all for now.
