1 Figures

Figure 1 is a PNG at its natural size, two inches wide at 300 dots per inch, and Figure 2 is a JPEG scaled to half the line width.

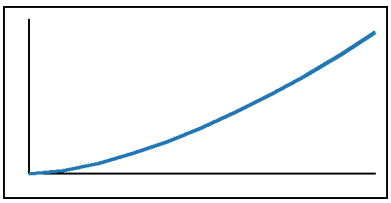

Figure 1: A plot at its natural size.

Text continues after the first figure and is long enough to wrap onto a second line, so the spacing after a figure can be measured.

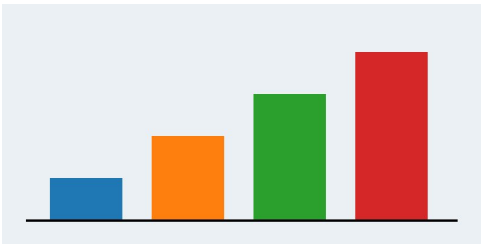

Figure 2: A bar chart scaled to half the line width.

After both figures the text continues.
