1 Tables

Table 1 has vertical and horizontal rules, and Table 2 is set in the style of the `booktabs` package, with fewer and lighter rules.

Table 1: A simple table.

Name	Count	Price
Apples	3	1.20
Pears	12	0.85
Total		2.05

Text continues after the first table and runs long enough to wrap onto a second line, so the spacing after a float can be measured.

Table 2: Energy return on investment by fuel: a caption long enough to need two lines in the article class, which then sets it as a paragraph.

Fuel	EROI	Year
Coal	46	2010
Oil and gas	16	2010

After both tables the text continues.
